WEAR IT WITH PRIDE!

USNA CLASS RING 2021

Jostens, in cooperation with the United States Naval Academy, is proud to be the manufacturer of the official ring of the Class of 2021. The Class of 2021 ring is the result of a year long process that began with midshipmen in the class producing artwork symbolizing the United States Naval Academy and the class of 2021. The artwork culminated in the polished final product, produced to the stringent specifications of the Academy. Each person who wears an Academy ring can share the bond of the Academy experience with graduates from all classes. However, the midshipmen of the class of 2021 can take further pride in the knowledge that no one can wear this particular ring except those privileged to be a part of this class.

This ring is part of a limited collection, and is quite an exclusive possession.

HERITAGE & TRADITION

The idea of designing a ring to represent service academies, colleges and high schools appears to have originated at West Point in 1835, with the class of 1836. The class designed a drum, a cannon and a saber on a heavy gold ring to distinguish members of their class. The class of 1837 followed suit, with a new design, and the tradition has been carried out at West Point ever since. The tradition extended to the Naval Academy in the 1870s, and the class of 1959 established it for the Air Force Academy.

Throughout the years, USNA and USMA rings became increasingly ornate, eventually taking on the current design. The service academy rings feature a class crest on one side and the Academy crest on the other, with a bezel surrounding a stone or similar inset on top. Tradition dictates that the midshipman wears the class crest facing him or her until graduation, when the ring is turned around so that the Academy crest faces the wearer. This tradition links the wearer more closely to his or her class until graduation and to all other Naval Academy alumni after graduation.
